Thyssen Fahrtreppen is setting standards concerning the quality of escalators. The 9 escalators from the type FT 51 at the „INNO“ department store are probably the oldest escalators in Europe. These escalators were installed 1956, and since that year the escalators are performing their work reliable every day. Due to the good maintenance and in spite of the daily use, the escalators are in a very good condition, as you can see on the pictures.
